In Search of New Foundations-Luigi Zingales 2000 Abstract: In this paper I argue that corporate finance theory, empirical research, practical applications, and policy recommendations are deeply rooted in an underlying theory of the firm. I also argue that while the existing theories have delivered very important and useful insights, they seem to be quite ineffective in helping us cope with the new type of firms that are emerging. I outline the characteristics that a new theory of the firm should satisfy and how such a theory could change the way we do corporate finance, both theoretically and empirically.

In the second part, Weed offers pages after page of stark quotations—some as short as a single sentence—from various Southern periodicals that illustrate in graphic detail the bondage, floggings, maimings and other horrors endured by slaves. Weed also presents and dissects various pro-slavery arguments. Outlined by the American Anti-Slavery Society, American Slavery As It Is was second only to Uncle Tom's Cabin for its impact on the anti-slavery movement in the United States.
